Reissue Applications

1. The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

In view of the surrender of original Patent No. 5,870,527 and the granting of Reissue Patent No. 5,870,527 which issued on February 9, 1999 all subsequent proceedings in this reexamination will be based on the reissue patent claims.

2. Claims 7-18 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Claim 7-18 appears to be deficient of allowable limitations such as “a robot control method having control operation performed by the preselected operation arc including a self operational arc so as to return to a first of the two states when passing between two states” and “a robot control system having controlling means for controlling the operation of a robot based on operating data producing means which suppresses the production of operating data corresponding to a self operational arc”.
